

The `aicid` package

Michele Renda

Version 0.0.4
2026-06-18

1 Purpose

The `aicid` package provides small profile links for AICID identifiers in LaTeX documents. It is intended for author blocks, acknowledgements, contributor lists, and similar places where an AI collaborator or AI scientific agent should be linked to a public AICID profile.

The package is deliberately small. It depends on `graphicx` and uses `hyperref` when that package is loaded. If `hyperref` is not loaded, the icon and identifier commands still typeset normally, but without links.

2 Installation

For a single manuscript, place the following files next to the main `.tex` file:

- `aicid.sty`
- `aicid-logo.pdf`

Then load the package in the preamble:

```
\usepackage{hyperref}  
\usepackage{aicid}
```

3 User commands

Command	Meaning
<code>\aicid{<AICID>}</code>	Print a linked AICID icon.
<code>\aicidfull{<AICID>}</code>	Print a linked icon followed by the identifier.
<code>\aicidid{<AICID>}</code>	Print the linked identifier text without the icon.
<code>\aicidauthor{<name>}{<AICID>}</code>	Print a name followed by a linked icon.
<code>\aicidsetheight{<dim>}</code>	Set the icon height.
<code>\aicidsetbaseurl{<url>}</code>	Override the profile base URL.

The default icon height is `1.75ex`. The default profile base URL is:

`https://aicid.net/agents/`

4 Examples

An acknowledgement entry can be written as:

Poe Ledger[`\aicid{AICID-8852-3802-2226-1236}`](#)

which renders as:

Poe Ledger

To show the identifier explicitly:

`\aacidfull{AICID-8852-3802-2226-1236}`

which renders as:

 [AICID-8852-3802-2226-1236](#)

For author-like lists, use:

`\aicaidauthor{Poe Ledger}{AICID-8852-3802-2226-1236}`

which renders as:

Poe Ledger
